Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

## Subject Index

Adherence,
Properties of oral streptococci relevant for —: zeta potential, surface free energy and elemental composition (Van der Mei et al.) 297
Adsorption,
— of human albumin onto hydroxyapatite. Static and dynamic studies (Aptel et al.) 159
— properties of $Ca^{2+}$ on Na-kaolinite and its effect on flocculation using polyacrylamides (Atesok et al.) 127
Enhanced polyelectrolyte — (Meadows et al.) 275
FTIR study of thionocarbamate — on sulfide minerals (Leppinen et al.) 113
Thermodynamics of — of surfactant mixtures on minerals (Harwell et al.) 1
Air–aqueous,
Desorption of spread monolayers of [$^{14}$C]-methylated and cold BSA from the — interface (Herrington, Sahi) 289
Aluminium hydroxide,
Metal complex formation on the surface of amorphous —. Part II. Copper(II) complexes of pyridinedicarboxylic acids (Micera et al.) 237
Metal complex formation on the surface of amorphous —. Part III. Copper (II) complexes of *O*-phospho-L-serine and *O*-phospho-L-tyrosine (Micera et al.) 249
1-Anilinonaphthalene-8-sulfonate,
Fluorescence emission from adsorbed bovine serum albumin and albumin-bound — studied by TIRF (Hlady, Andrady) 359
Asphaltene,
Emulsions of water in — containing oils. I. Droplet size distribution and emulsification rates (Eley et al.) 87
Emulsions of water in — containing oils. 2. Rheology (Eley et al.) 103
Barium titanate,
Homogeneous precipitation of spherical colloidal — particles (Gherardi, Matijević) 257
Bentonite,
The interfacial processes between calcium- — and zinc ion (Nagy, Kónya) 223
Benzene,
Microdynamical behaviour of — solubilized in reverse micelles. A study of deuterium NMR relaxation (Maitra) 157
Bovine serum albumin,
Desorption of spread monolayers of [$^{14}$C]-methylated and cold — from the air-aqueous interface (Herrington, Sahi) 289
Fluorescence emission from adsorbed — and albumin-bound 1-anilinonaphthalene-8-sulfonate studied by TIRF (Hlady, Andrady) 359
$Ca^{2+}$
Adsorption properties of — on Na-kaolinite and its effect on flocculation using polyacrylamides (Atesok et al.) 127
Calcium,
The interfacial processes between — -bentonite and zinc ion (Nagy, Kónya) 223
Coagulation,
Thermodynamic factors of the sol–gel transition. I. Reversible — of organophilic and hydrophilic colloids (Shchukin, Yaminsky) 19
Coalescence,
— and froth collapse in the presence of fatty acid (Espinosa-Gomez et al.) 197
Colloid stability,
Thermodynamic factors of the sol–gel transition. II. The role of short- and long-range forces in thermodynamics of — (Shchukin, Yaminsky) 33
Copper(II),
Metal complex formation on the surface of amorphous aluminium hydroxide. Part II. — complexes of pyridinedicarboxylic acids (Micera et al.) 237
Metal complex formation on the surface of amorphous aluminium hydroxide. Part III. — complexes of *O*-phospho-L-serine and *O*-phospho-L-tyrosine (Micera et al.) 249
Degreasing processes,
Criteria for oil detachment from solids.

Solutions of surfactants for oil recovery, —, etc. (Ostrovsky) 173
Desorption,
— of spread monolyaers of [$^{14}$C] methylated and cold BSA from the air–aqueous interface (Herrington, Sahi) 289
Deuterium NMR,
Microdynamical behaviour of bezene solubilized in reverse micelles. A study of — relaxation (Maitra) 157
Diblock copolymer,
Surface layer thickness in non-aqueous poly(methyl methacrylate) dispersions. II. Stabilization with the — poly(styrene-b-[ethylene-co-propylene]) (Dawkins, Shakir) 345
Dipalmitoylphosphatidylcholine,
Interactions of poly(acrylic acid)-complexed — vesicles with surfactants (Fukuda et al.) 211
Droplet size,
Emulsions of water in asphaltene-containing oils. I. — distribution and emulsification rates (Eley et al.) 87
Electrolyte,
The effect of — concentration on the zeta potentials of homoionic montmorillonite and illite (Horikawa et al.) 181
Emulsions of water,
— in asphaltene-containing oils. I. Droplet size distribtution and emulsification rates (Eley et al.) 87
— in asphaltene-containing oils. 2. Rheology (Eley et al.) 103
Fatty acid,
Coalescence and froth collapse in the presence of — (Espinosa-Gomez et al.) 197
Ferric hydro sols,
Interaction between hydrocarbon and fluorocarbon surfactants on monodisperse — (Esumi et al.) 139
Floc size,
— studies on kaolin suspensions flocculated with cationic polyacrylamides (Gill, Herrington) 331
Flocculation,
Adsorption properties of $Ca^{2+}$ on Na-kaolinite and its effect on — using polyacrylamides (Atesock et al.) 127
Fluorescence emission,
— from adsorbed bovine serum albumin and albumin-bound 1-anilinonaphthalene-8-sulfonate studied by TIRF (Hlady, Andrady) 359
Fluorocarbon,
Interaction between hydrocarbon and — surfactants on monodispersed ferric hydro sols (Esumi et al.) 139
Forces,
Thermodynamic factors of the sol-gel transition. II. The role of short- and long-range — in thermodynamics of colloid stability (Shchukin, Yaminsky) 33
Froth collapse,
Coalescence and — in the presence of fatty acid (Espinosa-Gomez et al.) 197
FTIR,
— study of thionocarbamate adsorption on sulfide minerals (Leppinen et al.) 113
Goethite,
Evolution of the surface of haematite prepared by thermal decompostion of —: a microcalorimetric study (Rossi et al.) 75
Hematite,
Evolution of the surface of — prepared by thermal decomposition of goethite: a microcalorimetric study (Rossi et al.) 75
Hematite/water,
Polyelectrolyte interactions at the — interface. Part 1 (Ramachandran, Somasundaran) 307
Polyelectrolyte interactions at the — interface. Part 2 (Ramachandran, Somasundaran) 319
Human albumin,
Adsorption of — onto hydroxyapatite. Static and dynamic studies (Aptel et al.) 159
Hydrocarbon,
Interaction between — and fluorocarbon surfactants on monodispersed ferric hydro sols (Esumi et al.) 139
Hydrophilic,
Thermodynamic factors of the sol-gel transition. I. Reversible coagulation of organophilic and — colloids (Shchukin, Yaminsky) 19
Hydroxyapatite
Adsorption of human albumin onto —. Static and dynamic studies (Aptel et al.) 159
Illite,

The effect of electrolyte concentration on the zeta potentials of homoionic montmorillonite and — (Horikawa et al.) 181
Kaolin,
Floc size studies on — suspensions flocculated with cationic polyacrylamides (Gill, Herrington) 331
Kaolinite,
Adsorption properties of $Ca^{2+}$ on Na- — and its effect on flocculation using polyacrylamides (Atesok et al.) 127
Layer thickness,
Surface — in non-aqueous poly(methyl methacrylate) dispersions. II. Stabilization with the diblock copolymer poly(styrene-b-[ethylene-co-propylene]) (Dawkins, Shakir) 345
Membranes,
Transport studies with model — (Siddiqi et al.) 57
Metal complex,
— formation on the surface of amorphous aluminium hydroxide. Part II. Copper(II) complexes of pyridinedicarboxylic acids (Micera et al.) 237
— formation on the surface of amorphous aluminium hydroxide. Part III. Copper(II) complexes of *O*-phospho-L-serine and *O*-phospho-L-tyrosine (Micera et al.) 249
[$^{14}$C] methylated,
Desorption of spread monolayers of — and cold BSA from the air-aqueous interface (Herrington, Sahi) 289
Microcalorimetric study,
Evolution of the surface of haematite prepared by thermal decomposition of goethite: a — (Rossi et al.) 75
Minerals,
FTIR study of thionocarbamate adsorption on sulfide — (Leppinen et al.) 113
Thermodynamics of adsorption of surfactant mixtures on — (Harwell et al.) 1
Monolayers,
Desorption of spread — of [$^{14}$C] methylated and cold BSA from the air-aqueous interface (Herrington, Sahi) 289
Monomolecular films,
Surface radioactivity measurements of — (Agrawal, Neuman) 177
Montmorillonite,
The effect of electrolyte concentration on the zeta potentials of homoionic — and illite (Horikawa et al.) 181
NMR,
Microdynamical behaviour of benzene solubilized in reverse micelles. A study of deuterium — relaxation (Maitra) 157
Oil detachment,
Criteria for — from solids. Solutions of surfactants for oil recovery, degreasing processes, etc. (Ostrovsky) 173
Organophilic,
Thermodynamic factors of the sol-gel transition. I. Reversible coagulation of — and hydrophilic colloids (Shchukin, Yaminsky) 19
*O*-phospho-L-serine,
Metal complex formation on the surface of amorphous aluminium hydroxide. Part III. Copper(II) complexes of — and *O*-phospho-L-tyrosine (Micera et al.) 249
*O*-phospho-L-tyrosine
Metal complex formation on the surface of amorphous aluminium hydroxide. Part III. Copper(II) complexes of *O*-phospho-L-serine and — (Micera et al.) 249
Polyacrylamides,
Adsorption properties of $Ca^{2+}$ on Na-kaolinite and its effect on flocculation using — (Atesok et al.) 127
Floc size studies on kaolin suspensions flocculated with cationic — (Gill, Herrington) 331
Poly(acrylic acid),
Interactions of — complexed dipalmitoylphosphatidylcholine vesicles with surfactants (Fukuda et al.) 211
Polyelectrolyte,
— interactions at the hematite/water interface. Part 1 (Ramachandran, Somsundaran) 307
— interactions at the hematite/water interface. Part 2 (Ramachandran, Somasundaran) 319
Enhanced — adsorption (Meadows et al.) 275
Poly(methyl methacrylate),
Surface layer thickness in non-aqueous — dispersions. II. Stabilization with the diblock copolymer poly(styrene-b-[ethylene-co-propylene]) (Dawkins, Shakir) 345

Poly(styrene-b-[ethylene-co-propylene]),
Surface layer thickness in non-aqueous poly(methyl methacrylate) dispersions. II. Stabilization with the diblock copolymer — (Dawkins, Shakir) 345
Precipitation,
Homogeneous — of spherical colloidal barium titanate particles (Gherardi, Matijevíc) 257
Pyridinedicarboxylic acids,
Metal complex formation on the surface of amorphous aluminium hydroxide. Part II. Copper(II) complexes of — (Micera et al.) 237
Radioactivity,
Surface — measurements of monomolecular films (Agrawal, Neuman) 177
Rheology,
Emulsions of water in asphaltene-containing oils. 2. — (Eley et al.) 103
Sol-gel transition,
Thermodynamic factors of the —. I. Reversible coagulation of organophilic and hydrophilic colloids (Shchukin, Yaminksy) 19
Thermodynamic factors of the —. II. The role of short- and long-range forces in thermodynamics of colloid stability (Shchukin, Yaminsky) 33
Solids,
Criteria for oil detachment form —. Solutions of surfactants for oil recovery, degreasing processes, etc. (Ostrovsky) 173
Stabilization,
Surface layer thickness in non-aqueous poly(methyl methacrylate) dispersions. II. — with the diblock copolymer poly(styrene-b-[ethylene-co-propylene]) (Dawkins, Shakir) 345
Streptococci,
Properties of oral — relevant for adherence: zeta, potential, surface free energy and elemental composition (Van der Mei et al.) 297
Surface free energy,
Properties of oral streptococci relevant for adherence: zeta potential, — and elemental composition (Van der Mei et al.) 297
Thermal decomposition,
Evolution of the surface of haematite prepared by — of goethite: a microcalorimetric study (Rossi et al.) 75
Thermodynamic factors,
— of the sol-gel transition. I. Reversible coagulation of organophilic and hydrophilic colloids (Shchukin, Yaminsky) 19
— of the sol-gel transition. II. The role of short- and long-range forces in thermodynamics of colloid stability (Shchukin, Yaminsky) 33
Thermodynamics,
— of adsorption of surfactant mixtures on minerals (Harwell et al.) 1
Thionocarbamate,
FTIR study of — adsorption on sulfide minerals (Leppinen et al.) 113
TIRF,
Fluorescence emission from adsorbed bovine serum albumin and albumin-bound 1-anilinonaphthalene-8-sulfonate studied by — (Hlady, Andrady) 359
Transportstudies
— with model membranes (Siddiqi et al.) 57
Zeta potential,
Properties of oral streptococci relevant for adherence: —, surface free energy and elemental composition (Van der Mei et al.) 297
Zeta potentials,
The effect of electrolyte concentration on the — of homoionic montmorillonite and illite (Horikawa et al.) 181
Zinc,
The interfacial processes between calcium-bentonite and — ion (Nagy, Kónya) 223
